Applications

The precision chippers of the DH series 910 process waste wood, wood slabs, log and preshredded root timber to different sizes of wood chips. The machines can handle trunk diameters up to 900 mm temporary.

Advantages

- Solid construction for industrial-scale continuous operation
- Variable infeed speed
- Closed, robust chipping drum - high rotor weight of more than 3.5 t for constant rotation speed and evenly-shaped wood chips
- Custom-built rotor with 45 mm blade advance for economical production of very large wood chips (P100 / G100)
- Throwing driven directly by the rotor for efficient chipping and long distance throwing
- Chipping knives with overload protection
- Changeable screens for various sizes of wood chips
- Easy setup and maintenance
